AT the time of the foundation of the Royal Institute of British Architects there existed in Lincoln's Inn Fields the Architectural Society, the primary objects of which were the advancement and diffusion of architectural knowledge, and its ultimate intent to form a British School, with Library, Museum, Professorships and periodical exhibitions, the want of which was then beginning to be greatly felt by students.* Instituted in 1831, the Architectural Society had for its governing body in 1834-35 William Barnard Clarke as President, Thomas Henry Wyatt as one of the Vice-Presidents, George Mair as Hon. Secretary, with Benjamin Ferrey among the ordinary members. In 1834 it became evident to a few architects of established reputation that the profession required a more influential representative institution than that which already existed, and an Address was circulated among the profession pointing out that though few of the arts and sciences were left without a Body associated for their promotion and cultivation, Architecture, as an art embracing the whole circle of the sciences, was in this country destitute of such an establishment.

The first meeting of the founders of the Institute† was held at the Thatched House Tavern, St. James's Street, on the 2nd July 1834, when

* An earlier society still was the London Architectural Society, established in 1806, probably the first institution formed by professional men with aims and objects similar to those of the present Royal Institute. By the rules of this Society members were required to produce annually, according to a rotation and time agreed upon, an architectural design never before in any way made public, consisting of at least one plan, elevation, and section, and accompanied with observations, critical and explanatory, under forfeiture of two guineas; also an essay on some subject connected with civil architecture, under forfeit of half-a-guinea. These designs, observations, and essays were discussed at General Meetings, and every member absenting himself for two successive nights was fined 5s., and also 5s. for every additional night of absence unless prevented by illness or a distance of ten miles from the place of meeting. The Society probably became extinct before the formation of the Architectural Society in 1831.

What was probably a forerunner of the London Architectural Society was a club called the Architects' Club, which was founded in 1791 and held its meetings at the Thatched House Tavern. The treasurer was Samuel Pepys Cockerell, father of Professor Cockerell (second President of the Institute), and grandfather of Frederick Pepys Cockerell (for many years Hon. Secretary). Among the original members were Sir William Chambers, Robert Adam, Robert Milne, John Soane, Thomas Hardwick, James Wyatt, George Dance, S. P. Cockerell. (See article by Mr. Harry Sirt, JOURNAL R.I.B.A. 7th January 1911.)

† The last surviving original member of the Institute, Professor Donaldson, died in 1885. He took a prominent part in the foundation. His letter convening the preliminary Meeting was as follows:—

7 Hart Street, Bloomsbury Square: 8th May 1834.

DEAR SIR,—Some of the following gentlemen, all of whom, as well as yourself, have received a circular from Mr. Robinson, are anxious to have a preliminary Meeting to talk over and consider the objects and prospects of the proposed Institution of British Architects, and will meet at Mr. Rainy's room, 14 Regent Street, on Tuesday

the Address setting forth the aims and objects of the proposed Institute was adopted. Endeavour was made to secure as members architects of prominent position and unimpeachable character, educated for and following their profession as an art, and free from those conflicting relations with trade which frequently existed in the early part of the century and prevented that implicit confidence on the part of the public which should enable a client to regard his architect not only as his agent, but as his friend and adviser. A second meeting, for the enrolment of members, was held on the 6th August 1834; and the Council, elected by ballot on the 3rd December following, and consisting of Messrs. Robinson, Kay, and Gwilt as Vice-Presidents, Messrs. Donaldson and Goldicutt as Hon. Secretaries, and Messrs. Barry (afterwards Sir Charles Barry), Basevi, Decimus Burton, Fowler, Philip Hardwick, Kendall, J. B. Papworth, and Rhodes, met for the first time on the 10th December at the Thatched House Tavern. A few weeks afterwards the Earl de Grey was elected President. The junction of the Architectural Society with the Institute was effected in 1842.

The Opening General Meeting of the Institute was held on the 15th June 1835. The President's Address, with that afterwards delivered by Professor Donaldson, will be found in the Institute TRANSACTIONS. Sir John Soane, Professor of Architecture at the Royal Academy, evinced his sympathy with the newly established body by giving a donation of £750 for such purposes as might appear most conducive to its advantage.

The Royal Charter was granted by King William IV. on the 11th January 1837. On the 8th August of the same year Queen Victoria became Patron, and was subsequently associated with the Prince Consort, who at all times manifested his interest in the Institute's proceedings, on one occasion, in 1842, acting as Chairman of the Council Meeting and afterwards presiding at the General Meeting.

A further and lasting mark of the Royal favour was shown in 1848 by the foundation by Queen Victoria of the Royal Gold Medal, since annually conferred by the Sovereign on some distinguished architect, or man of science or letters connected with architecture, on the recommendation of the Institute.

On the 18th May 1866 by Royal command the style of the Institute was altered to the "Royal" Institute of British Architects.

King Edward VII., Patron from 1863 till his death in 1910, continued the presentation of the Annual Gold Medal.

His present Majesty King George V., on his accession to the Throne, graciously intimated his pleasure to continue the Royal Patronage and the presentation of the Gold Medal.

In 1887, in order to bring the powers of the Institute more into line with the work it aspired to accomplish, and to render the fact of membership to a certain extent a test of proficiency, the Supplemental Charter of the

evening next, at half-past seven o'clock, when the favour of your attendance is earnestly desired. The chair will be taken at eight o'clock precisely.—I am, my dear Sir, yours very faithfully,

THOS. L. DONALDSON.

The names appended were Messrs. Atkinson, Barry, Basevi, B'lamy, Blore, Decimus Burton, Cressy, Fowler, Goldicutt, Gwilt, Hardwick, Kay, Kendall, Lee, Papworth, Parker, Sir John Rennie, Rhodes, Robinson, Seward, Taylor, and Wallen. The italics denote those who attended.

50th Victoria, conferring among other privileges power to hold examinations and issue certificates or diplomas, was granted, the document receiving the Royal Sign Manual on the 28th March 1887.

A further Supplemental Charter (8th Edward VII.), granted 11th January 1909, provided for a temporary class of Licentiates to be elected by the Council, made fresh provisions respecting the qualifications of candidates for Fellowship and the granting of diplomas, and extended the educational functions of the Institute.

In 1924 the proposals of the Council for the amalgamation of the R.I.B.A. and the Society of Architects with a view to the unification of the profession and the promotion of a Registration Bill were approved by the general body of the R.I.B.A. and by the Society of Architects.

The Supplemental Charter enabling the amalgamation agreement to be carried into effect received His Majesty's sanction in February, 1925. Among other important provisions the new Charter also enabled Licentiates to be constituted as full corporate members, gave equal voting rights to all Fellows, Associates and Licentiates, and entitled them to use the title "Chartered Architect." It further provided for the formation of a non-corporate class of subscribers, and gave the Council power to take a Referendum on important issues.

The new Bye-laws were approved at a meeting of the Privy Council on the 4th March, 1925, and among certain other improvements in the machinery of the R.I.B.A. provided for the reconstitution of the Council, so as to secure representation for all sections of membership and for the Allied Societies.

THE INSTITUTE PREMISES.

The first rooms of the Institute, engaged early in 1835, were at 43 King Street, Covent Garden, better known as Evans's Hotel, a building said to have been designed by Inigo Jones, and immortalised by Thackeray in *The Newcomes*, in the description of "The Cave of Harmony." In 1837 rooms were taken at No. 16 Grosvenor Street, where for twenty-two years the work of the Institute was carried on. The necessity of acquiring larger and more convenient premises led eventually to the formation of the Architectural Union Company, which was established, in the terms of its articles of association, "for the purpose of providing accommodation for the different societies connected with architecture, and especially for the Royal Institute of British Architects and the Architectural Exhibition." Sir Charles Barry was Chairman of the Company, Mr. (afterwards Sir William) Tite, Deputy Chairman, and a number of prominent members of the Institute were Directors. The then President, the Earl de Grey, presented to the Institute twenty shares in the Company free of all further calls. The Architectural Union Company, having purchased the property No. 9 Conduit Street, constructed the Galleries (afterwards known as the Conduit Street Galleries, and later as the Maddox Street Galleries) at the rear of the house. The Institute was assigned the entire suite of apartments on the principal floor (the present Library rooms), with separate staircase, a large room for casts, models, etc., and apartments for an attendant in the basement.

and upper floors. The premises were formally opened by Earl de Grey on the 7th November, 1859.

In 1890 the Institute took over the ground-floor and basement, now used as the Secretary's offices, and in 1897 acquired the second floor, where are located an annexe to the Members' Common Room, the Library store-room, and the typists' rooms.

In 1909 the Institute secured the leasehold interest in the Galleries which the then tenants held from the Architectural Union Company, and entered into possession of the entire building. At this date also, the Institute holding a considerable number of shares in the Company, advantage was taken of an opportunity to acquire the remainder, and in 1910 the Institute became practically tenant of the property in perpetuity, the lease, which is held direct from the Corporation of the City of London, being renewable on the periodical payment of a nominal fine.

Of the three Galleries in the rear of the building, the Great Gallery is used for General Meetings and, with the East Gallery, for the Examinations and for exhibitions of drawings, etc. The West Gallery, which contains the fine collection of portraits of Past Presidents, the work of eminent contemporary artists, serves as a Members' Common Room.

In 1922 the freehold of a piece of land adjoining the Maddox Street Corridor was purchased, and the reconstruction of the Great Gallery with a separate corridor from the Conduit Street Entrance direct to the enlarged East Gallery—now used as a Council Room—was completed in 1924.

With a view to the further and much-needed extension of premises the Council purchased in 1921 the Corporation leasehold of the adjoining building in Conduit Street, No. 10. The leasehold is perpetually renewable without fine and therefore practically a freehold.

THE COUNCIL DINNER CLUB.

The Council Dinner Club was founded during the presidency of the late Mr. Charles Barry (1876-79), to give Members of Council an opportunity of dining together in the interval between the close of a Council Meeting and the opening of a General Meeting of the Institute. It consists of all Members of the Council for the time being, past Presidents, past Vice-Presidents, and such other past Members of Council as the Club desires to elect. One of the functions of the Club is to entertain foreign architects of distinction visiting England, readers of Papers at General Meetings, and others whom the Institute would desire to honour. The Club is entirely self-supporting.

THE R.I.B.A. TRAVELLING CARDS.

Members, Students, and Probationers R.I.B.A. can obtain from the Institute a travelling card, or credential for travel abroad, available for a stated period. Persons requiring the cards for use in Italy must have them visé'd by the Italian Consul of their district. Cards are also available for use in the United Kingdom. Applications for the cards must be made in writing to *The Secretary R.I.B.A.* at the Office of the Institute; and in the case of non-members, the application must be accompanied by a letter from a member.

ASSESSORS IN COMPETITIONS.

Members of the Institute who have been requested to act as Assessors subsequent to the conditions of the Competition having been drawn, should obtain a copy of the conditions and consider their conformity with the Regulations issued by the Royal Institute, and should also notify the Secretary of the Institute that they have been asked to act.

REGISTER FOR ASSISTANTS SEEKING EMPLOYMENT.

This Register, kept at the office of the Institute, contains applications for varieties of work connected with the profession. The Book is always open to architects' assistants, improvers, pupils, and clerks-of-works; also to young architects desirous of becoming known to members of the Institute through their drawings or other work. Applicants desirous of being registered should give the following particulars:—(1) name and address; (2) age; (3) salary per week; (4) qualifications; (5) references. On obtaining an engagement the applicant should at once inform the Secretary, in order that the fact may be noted in the Register.

Architects, whether members of the Institute or not, will be furnished on application with the names and addresses of persons desiring employment as assistants, improvers, or clerks-of-works, as the case may be. Architects applying for assistants should give the following particulars of their requirements:—(1) whether temporary or permanent engagement; (2) junior or senior assistants; (3) particulars of duties and style of work; (4) salary offered.

REGISTER OF ARCHITECTS WILLING TO TAKE RECOGNISED SCHOOLS STUDENTS IN THEIR OFFICES.

On the recommendation of the Board of Architectural Education, the Council have decided to establish at the office of the R.I.B.A. two registers:

- (1) A register of advanced students of recognised schools.
- (2) A register of the names of architects willing to take such students.

The intention is in this way to assist advanced students up to the stage of the completion of their qualifications for exemption from the Final Examination; one of the qualifications for exemption from the Final Examination being twelve months' experience in an office during the fourth and fifth years of the school course.

The Council hope that general use will be made of the registers, and that as many architects as possible will place their names upon the register.

SUGGESTIONS GOVERNING THE PROFESSIONAL CONDUCT AND PRACTICE OF ARCHITECTS

An Architect in practice, if a Member or Licentiate of the R.I.B.A., is governed by established customs accepted and observed by the architectural profession, and more particularly by the Charter and Bye-laws of the Royal Institute which render him liable in the case of unprofessional conduct to reprimand, suspension or expulsion at the discretion of the Council.

The following may be considered to record in a general way the practice of architects and also to indicate a standard of conduct in any special cases not specifically referred to therein.

1. *An Architect is remunerated solely by his professional fees and is debarred from any other source of remuneration in connection with the works and duties entrusted to him. It is the duty of an Architect to uphold in every way possible the Scale of Professional Charges adopted by the Royal Institute. An Architect must not accept any work which involves the giving or receiving of discounts or commissions, nor must he accept any discount, gift or commission from contractors or tradesmen, whether employed upon his works or not.*

2. *If an Architect own, or have a commercial interest in, any material, device, or invention used in building, he must inform his client thereof, and must obtain his sanction before permitting it to be used in works executed under his direction.*

3. *An Architect must not publicly advertise nor offer his services by means of circulars. He may, however, publish illustrations or descriptions of his work, and exhibit his name on buildings in course of execution (providing it is done in an unostentatious manner) and may sign them when completed.*

4. *An Architect must not attempt to supplant another Architect, nor must he compete with another Architect by means of a reduction of fees or by other inducement.*

5. *In all cases of dispute between employer and contractor the Architect must act in an impartial manner. He must interpret the conditions of a contract with entire fairness as between the employer and the contractor.*

6. *An Architect must not permit the insertion of any clause in tenders, bills of quantities, or other contract documents which provides for payment to be made to him by the contractor (except for duplicate copies of drawings or documents) whatever may be the consideration, unless with the full knowledge and approval of his client.*

7. *An Architect should not take any part in a competition as to which the preliminary warning of the Royal Institute has been issued, and must not take any part in a competition as to which the Council of the Royal Institute shall have declared by a Resolution published in the JOURNAL of the Royal Institute that members or Licentiates must not take part because the Conditions are not in accordance with the published Regulations of the Royal Institute for Architectural Competitions.*

8. *An Architect must not act as Architect or joint Architect for a work which is or has been the subject of a competition in which he is or has been engaged as Assessor.*

9. *It is desirable that in cases where the Architect takes out the Quantities for his buildings he should be paid directly by the client and not through the Contractor except with the previous consent of the client.*

10. *The businesses of Auctioneering and House Agency are inconsistent with the profession of an Architect.*

11. *An Architect must not accept an appointment in any commercial firm in which the extent of his remuneration is affected by the profits of the firm.*

THE Library of the Royal Institute of British Architects consists principally of books presented by their authors, members of the corporate body. Many have been received in large donations, others by bequest. From time to time standard works of reference are purchased, to meet the requirements of the professional student, as well as to maintain the special character and historic value of the collection. Not the least interesting portion of the Library is that which includes rare and valuable editions of Foreign Works, mostly presented by Hon. Corr. Members.

From the 1st October till the end of June the Library is open from 10 a.m. to 8 p.m. (Saturdays 5 p.m.); in July and September it closes at 7 p.m. (Saturdays 2 p.m.). The Reference Library is closed during the whole of August, but Loan books may be received or issued between the hours of 12 and 2 daily (Saturdays 1 p.m.).

All Probationers, Students, and Qualified Candidates for Associateship on registration in the books of the Institute, are furnished with a card of admission, and such card must be shown by the reader at every visit. Cards are also granted on the recommendation of members of the Institute, professors of colleges, schoolmasters, and others, who are required to certify, on a form to be obtained at the Institute, that the persons they recommend are fit to be admitted to the privileges of the Reference Library and the Loan Collection.

The Council afford facilities to architects and others, not members of the Institute, to consult books in the Reference Library and to have the use of the Loan Collection. Applications should be made in writing to *The Secretary R.I.B.A.* at the Office of the Institute.

RULES TO BE OBSERVED IN THE LIBRARY.

THE REFERENCE LIBRARY.

1. Everyone using the Library must sign the Attendance Book placed at the entrance.

2. The front and back rooms are reserved for members of the Institute, but non-members are allowed access to any special books of reference there on application to the officer in charge.

3. No book or other work forming part of the Reference Library is allowed to be taken from the premises of the Institute, except by special resolution of the Council.

4. Readers desiring to trace are required to apply to the Librarian or official in charge for a form, which must be duly filled up, giving particulars of the work and specifying the portion it is intended to trace. Soft pencils

only may be used in tracing. In the case of rare and other valuable works, in order to preserve the print from injury, isinglass will be supplied for the purpose of tracing.

5. No compasses of any kind may be applied to any of the works, and the use of ink is prohibited at any table on which rare or costly works are placed.

6. Readers are requested to inform the official in charge when they have finished with any work, in order that it may be restored to its place.

7. Silence is necessary in the Library, and all oral communications should be conducted in an undertone.

THE LOAN LIBRARY.

8. The Loan Library is open for the issue and return of books during the same hours as those appointed for the Reference Library.

9. Not more than one volume at a time is issued to any one borrower, except by permission of the Librarian, and no volume may be retained longer than fourteen days, unless a written renewal from the Librarian has been obtained [see No. 12].

10. Application for works must be made personally, except in the case of Members, Students and Probationers of the Institute, who may send a written request by a person authorised to receive and sign for them, or may apply in writing to the Librarian for the volume to be sent by post or rail.

11. A borrower is required to sign a voucher for each book he takes out, and is responsible for the work so long as the voucher remains uncanceled. A book will not be accepted as returned unless it be delivered by hand to the official in charge at the Library during Library hours, and the borrower's receipt obtained in exchange. In the case, however, of a member of the Institute borrowing through the post, his letter of request shall be countersigned by the Librarian on the day when the volume is despatched, and shall be regarded as the borrower's voucher. Volumes shall be despatched at the cost of the Institute and returned at the cost of borrowers. On the return of a book the Librarian shall at once send the member a receipt. Books due for return on days when the Library is closed must be returned on the first following day when it is open.

12. Application for renewal must be made personally or by postcard in sufficient time to allow of the book being punctually returned if it cannot be renewed; if renewed or otherwise, a notice from the Librarian will be sent.

13. A fine of threepence must be paid for every day or portion of a day during which any volume is retained beyond the time allowed, unless the borrower can show a written renewal from the Librarian. And a fine of sixpence must be paid for every day or portion of a day during which any volume is retained after delivery at the borrower's address of a notice from the Librarian for its return (the day of delivery of such notice not included).

14. Borrowers are not to trace with ink or with a hard pencil, nor apply compasses of any kind to the works. Marking any book by writing, turning down leaves, etc., is strictly prohibited: this applies even to correction of a misprint, or to a single additional mark in a book, however much previously disfigured. Infringement of this rule will render the borrower liable to suspension from the use of the Loan Library. A borrower is liable to be called upon to replace at his own expense any work lost, marked, or injured while in his possession, or to pay a fine.

15. A borrower whose fines are unpaid will not be permitted to use the Loan Library; and if not a member of the Institute, he will also be debarred the use of the Reference Library.

THE Architectural Association (London) is carried on under the authority of the Literary and Scientific Institutions Act 1854. Its objects are to provide facilities for the study of Architecture, and to serve as a medium of friendly communication between the members and others interested in the study and progress of Architecture.

The President for the time being of the Architectural Association, provided he be a Fellow or an Associate of the Institute, is annually nominated as a member of the Council of the Royal Institute of British Architects.

The work of the Association is carried on at 34, 35 and 36 Bedford Square, W.C., where the General Meetings are also held. Members under the age of twenty-three years are allowed the use of the Library of the Institute and are furnished with passes for that purpose. The Association possesses a library, and there are reading and other rooms for the use of members, including a dining room.

A complete Course of instruction is given by means of the full-time Day Course in the School of Architecture. The Day School is under the direction of Mr. Robert Atkinson [F.], *Director of Education*, and Mr. Howard Robertson [F.], S.A.D.G., *Principal*, assisted by qualified masters and staff.

The Day School provides for five years of study, upon completion of which students are advised to enter architects' offices as Assistants.

The aim of the School is to provide for its students not only theoretical instruction in the Design and Engineering sides of architecture, but so to arrange its curriculum that the students, during their instruction, may find ample opportunity to gain practical experience in outside work or in the offices of practising architects.

The Council of the R.I.B.A. accept the Certificate issued upon satisfactory completion of the first three years of the Day School as granting exemption from the R.I.B.A. Intermediate Examinations. The A.A. Diploma, issued upon satisfactory completion of the full Five Years' Course, entitles the holder to exemption from the Final Examination of the R.I.B.A., with the exception of the examination in Professional Practice, and on passing the examination in this subject the holder becomes eligible for nomination for Associateship of the R.I.B.A.

Members are either (a) architects, or (b) writers, or (c) persons interested in furthering good building, and membership is divided as near as may be equally among these three classes.

Any order of the Tribunal may be enforced by the High Court as if it had been an order of that Court.

With the approval of the Lord Chancellor, amended Regulations have been made as to the procedure to be followed in cases of appeal, and as to fees to be paid to the Tribunal by the Appellants and other parties, copies of which may be obtained from the Clerk of the Tribunal on application (price 1s.).

The Association consists of Fellows—architects who have been in practice at least three years; Associates—architects not eligible as Members, architects' assistants and pupils; Honorary Members—persons who are not architects, but interested in architecture and the allied arts; Subscribers—persons engaged in the various crafts connected with the architectural art. The Annual General Meeting is held in April. General Meetings are held fortnightly on Fridays from the months of October to March.

Through the efforts of the Birmingham Architectural Association a School of Architecture has been founded at the Municipal School of Art, Birmingham, under the Directorship of Mr. W. H. Bidlake, M.A. [F.], Past President of the Association.

Sketching excursions are arranged for students, visits made to old buildings and to buildings in progress, and prizes offered for reports and sketches of the buildings visited. A permanent room is available for meetings, and the Library is open during the day.

ROYAL ARCHITECTURAL INSTITUTE OF CANADA.

590 Union Avenue, Montreal.

Hon. Secretary.

Alcide Chaussé, J.P., P.O. Box 304, Montreal.

The Royal Architectural Institute of Canada was founded as the Institute of Architects of Canada, 19th August 1907 ; was incorporated by Special Act of the Dominion Parliament, 16th June, 1908 (7 & 8

The asterisk (*) denotes a Licentiate R.I.B.A.

Edward VII, Chap. 82), under the corporate name of "The Architectural Institute of Canada," and was granted Royal permission to adopt the prefix "Royal" to its corporate name, 2nd June, 1909.

The Charter of the Institute was amended by a Special Act of Parliament, sanctioned 1st April 1912, and on 7th October 1912 the Council surrendered to a new Council, composed of the delegates of the various provincial associations of architects in Canada, all the assets and affairs of the Institute. This completes the Federation of all the Canadian architectural bodies, which has been the aim of the founders of the Institute since the date of its formation on the 19th August 1907.

The Federated Societies consist of the Alberta Association of Architects, the Manitoba Association of Architects, the Ontario Association of Architects, the Province of Quebec Association of Architects, the Saskatchewan Association of Architects, and the Architectural Institute of British Columbia.

The objects of the Royal Institute, as set forth in its Charter, are "to facilitate the acquirement and interchange of professional knowledge among its members, and more particularly to promote the acquisition of that species of knowledge which has special reference to the profession of architecture, and further to encourage investigation in connection with all branches and departments of knowledge connected with that profession." There are four classes of members—viz. (1) *Honorary Members*, who are persons eminent in Architecture or kindred sciences; (2) *Corresponding Members*, persons not residing in the Dominion of Canada, eminent as architects or archæologists, or in art, science or literature, who may render assistance in promoting the objects of the Royal Institute; (3) *Fellows*, who must have practised as architects for at least ten years; (4) *Associates*, architects having practised as architects for at least two years. A Code of Ethics, Schedule of Usual and Proper Minimum Charges, and Regulations for Architectural Competitions, were adopted in the General Annual Assembly on the 29th September 1908, held in Ottawa, Ont. The General Annual Meeting is held in February.

The Manchester Society of Architects (originally founded in 1865, and consisting exclusively of architects who at the time of their election had been in practice at least three years) was reconstructed in 1891 and incorporated under Section 23 of the Companies Act, 1867, as a limited company, the Articles of Association bearing date the 16th June, 1891. The objects are :—

(a) To support and protect the character, status and interests of architects practising in, or in the vicinity of, Manchester, and to promote personal acquaintance and good feeling between members of the Society. (b) To establish and maintain an acknowledged Code of professional practice and charges, &c. (c) To advance and encourage professional knowledge and study in the younger members of the profession by the foundation of classes for study, competition for prizes given by the Society, delivering of lectures and other means. (d) To obtain and consider information respecting competitions and all other matters affecting the profession, &c. (e) To afford mutual assistance by advice and mediation in case of misunderstanding between members, or between members and their employers or those employed under them, and in any other way to promote honourable conduct in the profession generally. . . . (g) To establish, form, and maintain a Library or other collection of architectural works, and to acquire, by purchase or donation, books, designs, drawings, and other articles of interest in connection with the profession.

The members consist of *Fellows*, who have been engaged in practice at least five years, and who are entitled to use the affix F.M.S.A.; *Associates*, who are at least twenty-three years of age, engaged in the study or practice of Architecture as a profession, and who are entitled to use the affix A.M.S.A.; *Students*, who are under twenty-three years of age and are engaged in the study of Architecture either as assistants or pupils. The Society possesses a Loan and Reference Library, containing some eleven hundred volumes, which is open to students, other than members, on certain conditions. Students' meetings are held during the Session, when Papers on architectural subjects are read. A large number of prizes are offered by the Society in competition to members of the Society, or to pupils or assistants in the offices of architects in Manchester or in the offices of members of the Society. The more important include the President's prize of Three Guineas for water-colour sketches; Mr. Beaumont's Prize (Three Guineas) for the best selection of Measured Drawings, &c., for the Society's Sketch Book; Prizes for Sketches and Measured Drawings; the Mills and Holden Prizes; and Prizes for the best work done in connection with the School of Architecture. The Council meet every month; General Meetings of the Society are held every three months, and Sessional Paper Meetings are held during the winter. The Annual General Meeting is held in April.

INSTITUTE OF ARCHITECTS OF NEW SOUTH WALES. [INCORPORATED.]

Secretary.

Lilian M. Jagers, Royal Society's House, 5 Elizabeth Street, Sydney.

The Institute of Architects of New South Wales, which was originally founded in 1871, was reconstructed in 1890, and formed into a corporate body with limited liability under section 54 of the Companies Act, 1874. The Memorandum of Association was amended by special resolution, confirmed by the Supreme Court of New South Wales, in December, 1920, and further amended in December, 1924, to provide for the fusion of the Institute of Architects, N.S.W., with the Architects Association, N.S.W. In this further amendment one class, "Member," was substituted for two classes, "Fellows" and "Associates."

Among the objects of the Institute are :—

The advancement of Architecture; the examination of applicants for membership; to represent generally the views of the profession, to preserve and maintain its integrity and status, and to suppress dishonourable and unprofessional conduct or practices; to afford means of adjusting professional differences and to decide all questions of usage or courtesy in connection with the profession; to promote professional good feeling and friendly intercourse amongst the members; to watch over, protect and promote the interests of the profession generally; to increase the confidence of the public in the profession; to acquire, form, and maintain Art and Scientific Libraries and Museums; to encourage and reward the study of Architecture by articulated pupils and others.

The Institute consists of Life Members, Members, and Honorary Members and such other classes or members, either subscribing or non-subscribing, as may be hereafter established by the Institute. *Life Members* are Architects who have been Members not less than ten years and who are elected Life Members for eminent services rendered to the Institute. *Members* are persons whose names appear as Fellows and Associates on the Register of the Institute of Architects, N.S.W., on December 1st, 1924, and thereafter persons engaged in the practice of architecture whose names appear on the Register of the Board of Architects, N.S.W., as entitled to practise and who have been duly elected under provisions in the Articles of Association. *Honorary Members* are gentlemen distinguished by scientific, artistic or literary attainments.

A Code of "Professional Practice and Charges," based upon that of the Royal Institute, but adapted to the different conditions of the State, was adopted in General Meeting on the 12th August, 1890, revised and adopted in General Meeting on 29th April, 1915, and again revised and adopted in General Meeting on 27th November, 1919.

The Annual General Meeting is held in January, February or March.

NOTTINGHAM AND DERBY ARCHITECTURAL SOCIETY.

[Province : Nottingham and the South part of Nottinghamshire, Derby and the South part of Derbyshire, Lincoln and the South part of Lincolnshire. Centre : Nottingham.]

Hon. Secretary and Treasurer.

H. H. Goodall [L.], 46 Bridlesmith Gate, Nottingham.

The Nottingham Architectural Society was instituted in 1862. The Derby Architectural Society was founded in 1908 and amalgamated with the Nottingham Society in 1913. The Rules were revised in 1914. The objects of the Society are the promotion of union and professional integrity among its several classes of members; the establishment as far as possible of uniformity of practice; and the general advancement of Architecture and the various arts and sciences connected therewith. The members consist of three classes, viz.: *Members*, architects engaged as principals not less than two years; *Associates*, architects not eligible as *Members*, architects' assistants and articled pupils; and *Honorary Members*, gentlemen distinguished for their attainments. General Meetings are held during the year, besides Special General Meetings which may be convened at any time. The Annual General Meeting is held in April. Students' Competitions are held annually, and in addition the Council offer prizes for the best set of measured drawings of any building of interest, Classical or Mediæval. The Society possesses an interesting and useful Library.

THE INCORPORATION OF ARCHITECTS IN SCOTLAND.

Telegraphic Address : " Architects, Edinburgh."

Secretary and Treasurer.

W. G. Walker, C.A. ; 15 Rutland Square, Edinburgh.

The Incorporation of Architects in Scotland was founded in 1916 and obtained a Royal Charter on 6th May, 1922.

The Incorporation maintains local divisions of its members known as Chapters, to each of which a definite portion of the whole territorial area of Scotland is assigned as its sphere of influence and action.

The Incorporation consists of three classes of Active Members : Fellows, Associates, and Students ; and two classes of Honorary Members : Honorary Fellows, and Honorary Corresponding Fellows. *Fellows* must be over thirty years of age, engaged as principals for at least five successive years, or engaged in professional education under an educational body in Scotland, recognised as such by the Council. *Associates* must be over twenty-one years of age and resident in Scotland ; who, having completed a term of pupilage or the equivalent in the Schools, are engaged in the practice of Architecture as principals, or employed as assistants in an architect's office recognised as such by the Council, or are engaged in professional study or education. *Students* must be over sixteen years of age and resident in Scotland who are pupils in an architect's office or are engaged in the study of Architecture in the Schools or in such other way as the Council recognise as equivalent ; candidates for the studentship are recommended to have the Leaving Certificate of the Scottish Education Department or its equivalent. Associates who have been engaged as principals for five years and who are otherwise eligible for Fellowship must apply for admission as Fellows, failing which the Council may consider they have resigned ; in like manner Students on becoming eligible must apply for admission as Associates, or have their names removed from the list. Membership of the Incorporation is conditional on concurrent membership of the Chapter within whose territory the member's office is situated. Each Chapter has its territorial designation as a Chapter of the Incorporation, but it may, with the consent of the Council of the Incorporation, retain a proper name or title other than its designation as a Chapter of the Incorporation. The Chapters number five, viz :

ABERDEEN SOCIETY OF ARCHITECTS.

DUNDEE INSTITUTE OF ARCHITECTS.

EDINBURGH ARCHITECTURAL ASSOCIATION.

GLASGOW INSTITUTE OF ARCHITECTS.

INVERNESS ARCHITECTURAL ASSOCIATION.

Each Chapter has its own President and Council, who manage the affairs of the Chapter and prepare an Annual Report for submission to the Annual Convention of the Incorporation. Each Chapter Council appoints from its own Chapter representatives to serve on the Council of the Incorporation. The Presidents of the several Chapters are Vice-Presidents of the Incorporation. Each Chapter may make new Bye-laws for its own government subject to the approval of the Council of the Incorporation. The Annual Convention of all the Members is held in or about the month of June at the place fixed at the preceding Annual Meeting. At the Annual Convention the new President is elected and installed.

Registrar : Murray K. Carpenter, 67 Exploration Building, Johannesburg.

The Association of Transvaal Architects was incorporated by private Act No. 39 of the Transvaal, assented to by the Governor, Lord Selborne, on the 7th July, 1909.

The Act was established for the registration of persons publicly practising or entitled to practise publicly, as Architects, in the Transvaal, so as to distinguish qualified from unqualified persons; to provide a qualification for

admission to the register of Architects ; to restrict the use of the title Architect ; to provide a penalty for infringement of the use of the title.

Every person publicly practising as an Architect in the Transvaal must be registered as an Architect in pursuance of this Act. Other architects qualified to practise but employed in official or salaried positions may be, and in many cases are, similarly registered.

An applicant, to obtain registration as an Architect in the Transvaal must be resident in British South Africa and have attained the age of 21 years. He must have passed either (1) the examination for Associateship of the Royal Institute of British Architects, or (2) the examination for membership of the Society of Architects (London), or (3) the examination or examinations conducted by the Council of the Association and prescribed by the Bye-laws of the Association, or (4) some other examination which may be declared by the Governor-in-Council, by proclamation, to be equivalent to one or any of these examinations. He must also have had at least four years' professional and practical experience as an assistant to an Architect. If prior to or at the time of the coming into operation of this Act, the applicant was registered as an Associate or Fellow of the Royal Institute of British Architects or as a Member of the Society of Architects (London) or the Transvaal Institute of Architects or of some other Society or Institute of Architects which may by proclamation be declared by the Governor-in-Council to be of a standing equal to that of one of the said Institutions, no other qualification is required.

The Act created a body corporate named " The Association of Transvaal Architects " of which every person registered as an architect *ipso facto* is a member. There are two classes of members, practising and salaried, and a register of student pupils is kept.

The Association is empowered to give effect to the provisions of the Act and to promote the objects for which the Association was created. This power is exercised through a Council of twelve members elected annually by and from the members of the Association.

The Council consists of a President, two Vice-Presidents and nine other Members (of whom four may be in salaried employment). They are elected annually at the General Meeting of the Association held in February in each year. Members of Council retire annually but are eligible for re-election.

Special meetings of members are held as circumstances require or upon the signed requisition of twelve members. Quarterly informal meetings at which lectures are delivered and matters of professional interest are discussed are regularly held.

To the Council is given the power to receive applications for registration and to register qualified persons ; to fix the amount of registration fee not exceeding £5 5s. ; to hold examinations for applicants for registration ; to enquire into alleged unprofessional or dishonourable conduct on the part of any member, and if necessary to apply to the Supreme Court for the suspension or removal from the register of such offending member, and generally to manage and conduct the affairs of the Association.

The Association may from time to time by Special General Meeting called for the purpose, make, amend, or repeal Bye-laws for giving effect to the provisions of the Act, and for the furtherance of the objects of the

Association, including: (a) Fixing the amount and date of due payment of annual subscriptions to be paid by members for the working expenses of the Association; (b) Defining unprofessional or dishonourable conduct in an architect; (c) Regulating the calling and holding of meetings; (d) Regulating the holding of examinations; (e) Fixing a scale of fees and charges which architects may make for their services.

The clerical work of the Association is carried out by a permanent official styled the Registrar. The work of the Council is assisted by several Committees, some of which include both members of the Association, outside the Council, and laymen interested in the work of the Association.

These Committees comprise Practice, Finance, Journal, Board of Examiners, Art and Education. Local Committees for the consideration of local matters meet from time to time in Pretoria and in the East Rand. Other activities in which the Association takes part are Representation upon the Executive Committee of the South African Scientific and Technical Association, the Seymour Technical Library, the British Standardising Committee, the Apprenticeship Committee for the Building Trades, Witwatersrand area, the Union Registration Executive for the furtherance of a Union Architects' Registration Act, the Union Practice Committee for the consideration of questions affecting architects generally within the Union, the Union Federal Council on Education, for the direction and co-ordination of Architectural education and examination throughout the Union. The Council through the Art and Education Committee has been instrumental in establishing the South African Academy, an annual exhibition of paintings, architectural studies, modelling, sculpture and craft work. By the initiative of the Association, coupled with monetary contributions from a considerable section of the members, the first Chair of Architecture in South Africa was established at the University of the Witwatersrand, Johannesburg.

The Association publishes its own quarterly official Journal under the title "*Building*." The Association has 144 members on the register at the present time—1924. The Association entered into affiliation with the Royal Institute of British Architects in the year 1923.

The present yearly subscriptions are:—Members practising in the Transvaal, £5 5s.; Members practising outside the Transvaal, £1 11s. 6d.; Members in salaried employment, £3 3s.; and Members resident outside South Africa, £1 1s.

BRISTOL SOCIETY OF ARCHITECTS.

Hon. Secretary.

G. D. Gordon Hake [F.], 1 The Paragon, Clifton, Bristol.

The Bristol Society of Architects was established in 1850, and reorganised in 1888. The Society exists for the purpose of maintaining the interests of the profession; for the educational advancement of local students; for the formation of a Library; and for insuring a uniformity and respectability of practice. The Members consist of *Fellows*—architects who have attained the age of thirty years, and who have been engaged as principals for at least five successive years in the practice of architecture; *Associates*—persons engaged in the study or practice of architecture who have attained

the age of twenty-one years ; *Honorary Associates*—persons not professionally engaged in practice as architects, who, by reason of their interest or ability in art, science, literature, or archæology, or their experience in matters relating to architecture or building, may appear to the Council to be able to render assistance in promoting the objects of the Society ; *Students*—persons engaged in the study of architecture, and who are not less than 16 years of age. Students have the privilege of attending ordinary meetings of the Society and of joining in discussions, but have no voice in the control of the Society's affairs. All Students are expected to qualify themselves for passing the Examinations of the R.I.B.A. The Annual General Meeting is held the second Monday in April, and monthly meetings are held from October to May, at which Papers are read and the business of the Society transacted. The Society, in collaboration with the Royal West of England Academy, was instrumental during the year 1920-21 in establishing the School of Architecture of that Academy, opened by H.R.H. the Prince of Wales on 10th July, 1921. The School is carried on at the premises of the Academy, and is open to students of Architecture irrespective of age or sex. It is affiliated with the school of the Architectural Association of London, but is controlled as to its educational policy and curriculum by a Council of which the majority are members of the Council of the Society who are also Artist Members of the Academy. The curriculum closely follows that of the school of the Architectural Association, the teaching being by masters who are masters at that school. The general system of education is, however, that of combined apprenticeship to a practising architect and school work, though special cases are dealt with on their merits, and apprenticeship and office work are not compulsory.

THE ROYAL INSTITUTE OF THE ARCHITECTS OF WESTERN AUSTRALIA INCORPORATED.

Professional Societies' Rooms, 333 Murray Street, Perth, Western Australia.

Hon. Secretary.

S. Rosenthal, Trinity House, St. George's Terrace, Perth.

The Royal Institute of the Architects of Western Australia was founded in 1892, incorporated in 1902, and admitted to alliance with the Royal Institute in 1910. The Institute consists of Life Fellows, Fellows, Associates and Honorary Fellows. The Institute has power to grant diplomas or certificates in connection with examinations or otherwise in such manner as the Council may prescribe.

The asterisk (*) denotes a Licentiate R.I.B.A.

Since the passing of the Architects' Act, 1921, the Statutory Examination for registration has been adopted as the qualifying examination for Associate of the Institute; it embraces all the subjects included in the R.I.B.A. "Intermediate" and "Final" examinations, and is almost at a similar standard.

* * The objects for which the Institute was established and the qualifications and attainments of candidates for membership are, in general, similar to those of the Royal Victorian Institute—see page 489.

The Royal Institute of British Architects may cause to be examined by such persons and in such manner as they think fit all candidates presenting themselves for the purpose of being examined as to their competency to perform the duties of District Surveyor, and shall grant certificates of competency to the candidates found deserving of the same, and a person who has not already filled the office of District Surveyor shall not be qualified to be appointed to that office unless he has received a certificate of competency from the said Institute or has been examined in such other manner as the Council may direct and been found competent in such examination.

The candidate must be prepared to answer orally, in writing, and by means of architectural drawings, questions upon the following points, in order to satisfy the Board as to his competency for the office of a District Surveyor :

The rough methods of testing them on the spot. The bonding of masonry and brickwork, use of mortar and cement, framing of carpentry, and the testing of trusses and timber girders.
2. The loads and stresses affecting structures, and the modes of estimating them and calculating arches and the different parts of timber, reinforced concrete and steel structures ; especially such rapid modes of calculating as can be employed on the spot readily.
3. Cast iron, wrought iron, and steel. The design, testing, and fixing of constructional iron and steel work.
4. Foundations in various kinds of soil, and precautions to be taken in digging them ; expedients when the bottom is bad or under water. The risks of accident due to interference with foundations after they have been put in, or to increasing the load on them. The foundations of high chimney shafts. Indications of the failure of foundations.
5. Usual defects in construction and materials. Decay of structures. Neglected and dangerous structures. Shoring, underpinning, repair of walls, tying buildings together, forming openings in existing walls. The force of storms and stability of high structures.
6. The behaviour of various materials and modes of construction with reference to fire. Fire-resisting construction. Precautions necessary in heating and lighting buildings. Precautions to be taken in the storage of water.
7. The London Building Act of 1894, and all Amendments of 1898, 1905, 1908, 1909, and the bye-laws in force ; and the ordinary procedure thereunder, including the mode of valuing a party wall.
8. Defects or deficiencies in plans for a proposed building.

The Examination is held once a year, in the month of October. For particulars as to attendance, fees, &c., see page 367.

- (c) That he will not during his continuance in office (except in the discharge of the duties thereof) carry on business as an architect, surveyor, or builder, or directly or indirectly, as a partner or otherwise, be interested in such business.
- (d) That he will make no claim for compensation in case a diminution of his income shall at any time hereafter arise, and that the Council shall not be liable to compensate him for any diminution of income which may be caused by any statutory alteration of the fees payable to District Surveyors in respect of alterations and additions to buildings.
- (e) That he will keep his District Office open from Monday to Friday (both inclusive) between the hours of 9.30 a.m. and 5 p.m., and on Saturday from 9.30 a.m. until 1 p.m., and give his personal attendance there daily from 9.30 to 10.30 a.m.

SCALE OF PROFESSIONAL CHARGES.

First issued in 1872 ; Revised in 1898 and 1919.

CONDITIONS OF ENGAGEMENT.

The Architect is employed subject to the following Conditions founded upon the Customs of the Profession, and his remuneration is payable according to the Scale of Charges hereinafter stated, which Scale is fixed and accepted on the basis of the same Conditions :—

(a) That the general supervision which the Architect will give to the work is such periodical inspection by him or his deputy as may be necessary to ensure that the work is being carried out in accordance with his design, but constant superintendence of the works does not form part of the duties undertaken by him and is not included for in the following Scale of Charges.

(b) That in all cases in which constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect and appointed and paid by the Client. He shall be under the Architect's direction and control, but the Architect shall not be held responsible for any fraud or negligence on the part of the Clerk of Works.

(c) That the issue of a certificate by the Architect for a payment to the Contractor implies only that in the Architect's opinion work has been done at the date of the certificate to the value stated thereon, and to the best of his belief in accordance with the contract or order. No certificate, however, whether final or otherwise, shall be held to render the Architect responsible for improper execution of the work or for any breach by the Contractor of the terms of the contract or order.

(d) That the Architect has authority to give such orders on behalf of the Client as are necessitated in the Client's interests by constructional emergencies.

(e) That the Architect is empowered to make such deviations, alterations, additions, and omissions, as he may reasonably consider desirable in the Client's interests in carrying out the works, provided that no material addition to the cost of the contract or order is caused thereby.

(f) That the fees of any Consultant or Consultants retained for any part of the work with the concurrence of the Client shall be paid for by the Client.

(g) That in all cases in which any projected work is not proceeded with for a period of two years after drawings have been prepared the Architect's services shall be paid for as for abandoned work.

(h) That all drawings, specifications, and documents prepared by the Architect shall remain his property, the copyright in the same being reserved to him.

(i) That the cost of the preparation of quantities, the measurement and valuation of variations, additions, omissions, and the preparation of the statement of accounts is not included in the Charges named in Clauses Nos. 1 to 8, but is to be paid in addition thereto.

SCALE OF CHARGES.

Clause 1.—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing Consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, the charge in respect of new works is to be a percentage on the total cost of all executed works as follows :—

(a) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Clause 2.—In the case of alterations of and additions to existing buildings a higher percentage may be charged, not exceeding twice the amount due under Clause 1 for new works of the same cost.

Clause 3.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Clause 4.—In addition to the percentage on the total cost of executed works, the architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

Clause 5.—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows :—

(a) For taking Client's instructions, preparing sketch design, and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

(b) For taking Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

SCALE OF ARCHITECTS' CHARGES FOR HOUSING WORK.

With the object of assisting in the solution of the National Housing Problem, and having in view the necessity for the employment of qualified Architects on housing work, the members of the Royal Institute of British Architects assembled in general meeting have resolved to modify their charges in connection with housing schemes for Local Authorities and Public Utility Societies and have agreed to accept the following reduced scale of charges for such work.

The conditions of engagement of architects and surveyors shall be those which are customary in their respective professions, such as the conditions prescribed by the Royal Institute of British Architects in the case of the engagement of architects.

A. *Preparation of Lay-out Plans for Cottages or Two-storey Flats and Tenements.*

Note.—In calculating architects' fees for the preparation of lay-out plans the number of houses shall be understood to mean the number of houses on any one site.

For the preparation of a plan or scheme from existing maps, showing roads, builders' plots and buildings in block, including :—

- (1) Conference with local authorities and their officials.
- (2) Lay-out plan (where necessary) to 1/2500 scale.
- (3) Detailed lay-out plan or plans to 1/500 scale.

But exclusive of the preparation of detailed plans of buildings :—

For the first 25 houses	£1	0	0	per house.
For the next 75 houses	10	0	„	
For the remainder	7	6	„	

In cases where the number of houses has not been determined the fee shall be based on an average of 12 houses per acre. If a fully contoured plan of the site is not provided by the local authority an extra charge shall be made by the architect for taking levels of the site based on the time expended. This clause does not apply to the lay-out for flats or tenements exceeding two storeys in height, the charge for which shall be governed by special circumstances.

If the carrying out of a lay-out scheme be abandoned, the architects' fees shall, nevertheless, be paid in full, provided that the preparation of the plans for such scheme has been completed by the architect.

B. *Roads and Sewers.*

In calculating architects' fees for roads and sewers, the number of houses shall be understood to mean the number of houses on any one site.

(1) *Executed Works*.—For preparing working drawings and specifications for roads and sewers in accordance with the lay-out plans prepared under Section A, advising on the same and on the preparation of contract, furnishing to the contractor one copy of the drawings and specifications, general supervision, issuing certificates, passing and certifying the accounts :—

The charge shall be at the rate of £2 per house.

(2) *Abandoned Works*.—In the event of the work or part of it being abandoned the charge shall be as follows :—

If the preliminary scheme of roads, drains and sewers based on contour levels has been prepared, one-sixth of the full rate for executed works stated in Section B (1) above.

If, in addition, the roads have been pegged out and the levels taken for sections, two-sixths of the full rate for executed works.

If, in addition, the sections have been set up in accordance with the levels taken and embodied in the working drawings of roads and sewers, three-sixths of the full rate for executed works.

If, in addition, specifications have been prepared and all the work necessary for the purpose of obtaining tenders has been done, four-sixths of the full rate for executed works.

C. House Plans (*Cottages or Two-storey Flats*).

Note.—In calculating architects' fees for the preparation of plans for cottages or two-storey flats the number of houses shall be understood to mean the number of houses for which any individual architect may be employed. In the event of such houses being erected under a number of separate contracts an additional charge may be made for the extra work involved.

(1) *Executed Works*.—For taking instructions, preparing sketch designs, making approximate estimate of cost, preparing drawings and specifications, obtaining tenders, advising on tenders and on preparation of contract, selecting and instructing consultants, furnishing to the contractor one copy of the drawings and specifications, and such other details as are necessary for the proper carrying out of the works, general supervision, issuing certificates for payment, and passing and certifying accounts :—

The charge shall be six per cent. upon the cost of the first pair of houses of approved design, and in addition upon the cost of one house only of each further separate design.

"Cost" shall be understood to mean the *average* cost of a house, such average being calculated over the whole contract or contracts.

For repetition work the following charges shall apply :—

For the next 50 houses	£9 0 0 per house.
For the next 50 houses	8 0 0 "
For the next 100 houses	6 10 0 "
Over and above 200 houses	5 0 0 "

The respective numbers referred to include the original designs.

(2) *Abandoned Works*.—If the project or part of it be abandoned, or if the services of the architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the work abandoned or for which the architect was employed (as the case may be) are as follows :—

(a) For taking client's instructions, preparing sketch design and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the charges for executed work stated in Clause C (1) above.

(b) For taking client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the charges for executed work stated in Clause C (1) above.

Charges for abandoned work shall be made in respect of houses up to the number of fifty only, and shall be based upon the average cost or approved estimated cost.

D. *Plans for Flats and Tenements exceeding Two Storeys in Height.*

Note.—In calculating architects' fees for the preparation of plans under this heading, the number of flats and tenements shall be understood to mean the number of flats and tenements for which any individual architect may be employed. In the event of such flats or tenements being erected under a number of separate contracts, an additional charge may be made for the extra work involved.

(1) *Executed Works.*—For taking instructions, preparing sketch designs, making approximate estimate of cost, preparing drawings and specifications, obtaining tenders, advising on tenders and on preparation of contract, selecting and instructing consultants, furnishing to the contractor one copy of the drawings and specifications, and such other details as are necessary for the proper carrying out of the works, general supervision, issuing certificates for payment, and passing and certifying accounts, the charge shall be as follows:—

(2) *Abandoned Works.*—If the project or part of it be abandoned, or if the services of the architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the work abandoned or for which the architect was employed (as the case may be) shall be as follows:—

(a) For taking client's instructions, preparing sketch design and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the charges for executed works stated in Clause D (1) above.

(b) For taking client's instructions, preparing sketch design, and making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the charges for executed works stated in Clause D (1) above.

Charges for abandoned work shall be made in respect of flats and tenements up to the number of fifty only, and shall be based upon the average cost or approved estimated cost.

E. *Out-of-Pocket Expenses.*—This Scale is exclusive of reasonable travelling and out-of-pocket expenses.

REGULATIONS* GOVERNING THE PROMOTION AND CONDUCT OF ARCHITECTURAL COMPETITIONS AS APPROVED BY THE ROYAL INSTITUTE OF BRITISH ARCHITECTS AND BY ITS ALLIED SOCIETIES.

[Re-issue after revision : December, 1910, February, 1921, and March, 1924.]

It is assumed that the object of the Promoters is to obtain the best design for the purpose in view. Where the Promoters desire to achieve this end by means of a Competition experience shows that this object may best be secured by conducting all Competitions upon the lines laid down in the following Regulations, which have been framed with a view to securing the best results to the Promoters with scrupulous fairness to the competitors.

Members and Licentiates of the Royal Institute of British Architects, Members of its Allied Societies and Members and Licentiates of the Society of Architects do not compete excepting under conditions based on these Regulations.

The Conditions of a Competition shall contain the following Regulations (A) to (F) as essential :—

(A) The nomination for every Competition of an Assessor or Assessors who shall be Architects of acknowledged standing to whom the whole of the designs shall be submitted.

(B) Each design shall be accompanied by a declaration, signed by the competitor, or joint competitors, stating that the design is his or their own personal work, and that the drawings have been prepared under his or their own supervision. A successful competitor must be prepared to satisfy the Assessor that he is the *bona fide* author of the design he has submitted.

(C) No Promoter of a Competition, and no Assessor engaged upon it, nor any employee of either, shall compete or ASSIST A COMPETITOR, or act as Architect, or joint Architect, for the proposed work.

(D) The premiums shall be paid in accordance with the Assessor's award, and the author of the design placed first by the Assessor shall be employed to carry out the work, unless the Assessor shall be satisfied that there is some valid objection to such employment, in which case

* These Regulations have been approved and adopted by the Society of Architects.

the author of the design placed next in order of merit shall be employed, subject to a similar condition. The award of the Assessor shall not be varied for any other reason.

(E) If no instructions are given to the author of the design selected by the Assessor to proceed within twelve months from the date of the award, then he shall receive payment for his services in connection with the preparation of the Competition drawings of a sum equal to $1\frac{1}{2}$ per cent. on the amount of the estimated cost stated in the conditions up to £50,000, but if the estimated cost of the work exceeds £50,000 he shall be paid a sum equal to $1\frac{1}{2}$ per cent. upon the first £50,000, plus $\frac{1}{2}$ per cent. upon any sum in excess of that amount. The first premium shall be deducted from the sum so paid. If the work is subsequently proceeded with, this sum shall form part of his ultimate commission.

(F) The selected Architect having been appointed to carry out the work shall be paid in accordance with the Schedule of Charges sanctioned and published by the Royal Institute of British Architects, and the premium already paid shall be deemed to be a payment on account.

1. The Promoters of an intended Competition should, AS THEIR FIRST STEP, appoint one or more professional Assessors, Architects of acknowledged standing, whose appointment should be published in the original advertisements and instructions. The selection of an Assessor or of two or more Assessors to act as a Jury should be made with the greatest possible care, as the successful result of the Competition will depend very largely upon their experience and ability. The name or names of the Assessor or Assessors should always appear in the conditions governing a Competition or in any advertisement or other announcement relating thereto.

The usual R.I.B.A. Scale of Charges for Assessing Competitions is the sum of Fifty Guineas, plus one-fifth per cent. upon the estimated cost of the proposed building.

In the event of more than ONE ASSESSOR being appointed, the remuneration shall be decided by mutual arrangement between the Assessors and the Promoters.

The President of the Royal Institute of British Architects is always prepared to act as honorary adviser to Promoters in their appointment of Assessors.

2. The duties of Assessors are as follows :—

(a) To confer with and advise the Promoters on their requirements and on the questions of cost and premiums to be offered.

(b) To draw up instructions for the guidance of competitors and for the conduct of the Competition, incorporating the whole of the clauses of these Regulations which are applicable to the particular Competition.

Note.—It is essential in drawing up the Instructions to state definitely which of the conditions must be strictly adhered to, under penalty of disqualification from the Competition, and which of them are optional.

(c) To answer queries raised by competitors within a limited time during the preparation of the designs, such answers to be sent to all competitors.

(d) To examine all the designs submitted by competitors and to determine whether they conform to the Conditions and to exclude any which do not.

(e) To report to the Promoters on the designs not so excluded and to award the premiums in strict accordance with the Conditions.

(f) To inform the Promoters if necessary that modifications may be made in the winning design by the successful Architect, if so desired by the Promoters.

3. Competitions may be conducted in one of the following ways :—

(a) By advertisement, inviting Architects willing to compete for the intended work to send in designs. FOR COMPETITIONS FOR PUBLIC WORKS THIS METHOD IS RECOMMENDED.

(b) By advertisement, inviting Architects willing to compete for the intended work to send in their names by a given day, with such other information as they may think likely to advance their claims to be admitted to the Competition. From these names the Promoters, with the advice of the Assessors, shall select a limited number to compete, and each competitor thus selected shall receive a specified sum for the preparation of his design.

(c) By personal invitation to a limited number of selected Architects to join in a competition for the intended work. Each competitor shall receive a specified sum for the preparation of his design.

Note.—Where a deposit is required for supplying the Instructions it shall be returned on the receipt of a *bona fide* design, or if the applicant declines to compete and returns the said Instructions within four weeks of the date for submitting designs.

4. The number, scale, and method of finishing of the required drawings shall be distinctly set forth. The drawings shall not be more in number or to a larger scale than necessary clearly to explain the design, and such drawings shall be uniform in size, number, mode of colouring and mounting. As a general rule a scale of 16 feet to 1 inch will be found sufficient for plans, sections, and elevations, or, in the case of very large buildings, a smaller scale might suffice.

Unless the Assessors advise that perspective drawings are desirable, they shall not be admitted.

5. No design shall bear any motto or distinguishing mark ; but all designs shall be numbered by the Promoters in order of receipt.

6. A design shall be excluded from a Competition—

(a) If sent in after the period named (accidents in transit excepted) ;

(b) If it does not give substantially the accommodation asked for ;

(c) If it exceeds the limits of site as shown on the plan issued by the Promoters, the figured dimensions on which shall be adhered to ;

(d) If the Assessors shall determine that its probable cost will exceed by 10 per cent. the outlay stated in the Instructions, or the estimate of the competitor should no outlay be stated.

(e) If any of the Conditions or Instructions other than those of a suggestive character are disregarded ;

(f) If a competitor shall disclose his identity or attempt to influence the decision.

7. All designs and reports submitted in a Competition, except any excluded under Clause 6, together with a copy of the Assessor's Award, should be publicly exhibited for at least six days. Due notice shall be given to all competitors of the date and place of such exhibition. It is desirable that competitors should be furnished with a copy of the Assessor's Award.

8. All drawings submitted in a Competition, except those of the design selected to be carried out, shall be returned carriage paid to the competitors within fourteen days of the closing of the Exhibition.

9. The Conditions of a Competition issued by a Corporate Body should have the Common Seal of that body affixed thereto.

REGULATIONS FOR INTERNATIONAL ARCHITECTURAL COMPETITIONS.

*Settled at Paris, November, 1908, by the International Competitions Commission appointed by the VIIth International Congress of Architects (London, 1906).**

1. International Competitions should be reserved for exceptional occasions of a really international character.

2. International Competitions may be either open to all architects without invitation, or limited and by invitation.

Limited and invited Competitions may consist of a single stage.

Competitions open to all should be held preferably in two stages.

3. The "Conditions" of International Competitions are to be identical for all competitors.

No drawing, model or document shall be taken into consideration except those specified in the Conditions, nor shall any other drawing, model or document be exhibited.

4. The Instructions to Competitors should state definitely the Conditions of the Competition, and matters considered desirable should not be left to the option of Competitors.

5. In limited and invited Competitions, the Conditions should be fully detailed and require the scheme to be fully developed.

In Competitions open to all the Conditions should express the technical requirements in general terms and limit the number and scale of the drawings to the minimum necessary for the jury to understand the design.

The Conditions should require designs to be submitted anonymously under the motto in the first stage, and to be signed by the Authors in the second stage.

Competitors are forbidden under penalty of exclusion to act in any way which would tend to disclose their identity.

* See report of the British delegate, Mr. John W. Simpson, JOURNAL R.I.B.A., 9th January, 1909.

6. In double Competitions the Conditions in the first stage should be as those for Competitions open to all, and in the second stage as those for limited and invited Competitions.

Designs selected in the first stage only can be admitted to the second stage.

7. The Conditions of a Competition should be published and placed at the disposal of the Competitors as nearly as possible on the same date in all countries.

Any design not dispatched by the date of closing the Competition shall be excluded; the Carrier's receipt shall be accepted as proof.

8. The Conditions should be prepared in consultation with experienced Architects.

They shall be published in the French language.

9. The jury is to be nominated by the Promoters of the Competition; it is recommended that Promoters, before nominating the foreign members, should place themselves in communication with the Comité Permanent.

The jury of an International Competition shall be composed of Architects, each of different nationality, one of whom shall belong to the country which institutes the Competition. A legal authority, nominated by the Administration promoting the Competition, shall preside in order to ensure regular procedure, but shall have no vote.

The members of the jury, by accepting nomination, shall be held to have declared themselves to have no material interest, either directly or indirectly, in the result of the Competition.

10. It is desirable in International Competitions, and especially in the preliminary stages, that the limit of cost shall be only approximately fixed in order to leave some liberty to the artistic conception of Competitors.

When the sum available for carrying out the work is specified, the Conditions of Competition should give the information required for preparing approximate estimates on a uniform basis.

11. The total value of the premiums to be awarded shall be $2\frac{1}{2}$ per cent. on the cost for works not exceeding £100,000 in value, 2 per cent. on those not exceeding £200,000, and $1\frac{1}{2}$ per cent. for works beyond that value.

The principle must be enforced that the carrying out of the work be entrusted to the Architect placed first, subject to the conditions in force in the country promoting the Competition.

The amount of the prize shall not be deducted from the amount of the fees payable.

In the event of the person or Corporation promoting the Competition wishing to reserve the right to pass over the Architect placed first, the Conditions of Competition must state the terms of compensation.

Should the work not be executed, the same compensation shall be due.

In all cases the authors of designs submitted retain the artistic copyright in their design, and in the building which is a reproduction thereof.

12. In single-stage Competitions all the designs shall be exhibited in a suitable place and for a sufficient time to enable all Competitors to visit the Exhibition, which should be advertised beforehand in the professional papers.

In double Competitions there shall be no Exhibition after the first award; all the drawings shall be placed under seal and exhibited subsequently, together with the designs in the final Competition.

The authors of designs selected in the first stage shall have the right to make tracings thereof for use in preparing their final designs.

The full report of the jury, giving their reasons for the award, shall be published before the opening of the Exhibition and communicated to all the parties interested.

CONSERVATION OF ANCIENT MONUMENTS.*

GENERAL ADVICE TO PROMOTERS OF RESTORATIONS.

[First issued in 1865; revised and enlarged in 1888.]

1. Before any alteration is decided on, a competent architect should be consulted and be requested to make careful drawings of the building, with accurate measurements. Photographs should then be taken of all objects of interest, especially such as are so dilapidated and decayed that it becomes absolutely necessary to renew them either wholly or in part. In the case of churches, these photographs and copies of the drawings should be deposited in the vestry, parish registry, or any public office in the diocese suitable for the purpose, and the date of their consignment noted.

Any clearance of wall linings, pavements, flooring, galleries, high pews, modern wall partitions, or other encumbrances (provided that they be clearly modern) necessary before detailed arrangements are made for the restoration, should only be carried out under the direction of the architect, and after his inspection of the church; and such clearance should not include works of artistic or other interest which it is often most important to preserve. No memorial slabs, tiles, steps, or other pavements should be removed without his special permission.

2. Careful enquiry should be made for any portions of church furniture—stained glass, sculpture, brasses—or other old work which may at any time have been removed from the building, with a view to their restoration to their proper place.

* To be obtained at the Office of the Institute, price Ninepence.

3. Buildings of the same style and character in the neighbourhood should be examined when any doubts arise as to the original design in any part.

4. Diligent search should be made for indications of ancient doorways, window openings, reredoses, aumbries, piscinæ, sedilia, Easter sepulchres, altar stones, stoups, rood staircases, hagioscopes, low side-windows, recessed tombs, brasses, incised stones, encaustic tiles, or any other features of ancient character. Should any part be altogether destroyed, careful search should be made for any traces of old foundations or any detached pieces of masonry, etc., built in with the modern walls, so as to obtain a key to the original design of parts which have been defaced or destroyed. When any such stones are discovered the architect should be at once informed, in order that he may personally visit and examine the work.

5. All plastered surfaces should be carefully examined with a view to discovering any remains of painting upon them, and all painted or white-washed stone or wood-work cautiously cleaned, so that no injury may be done to any painting, diapering, powdering, or other coloured design, if such exist. Where it is proposed to renew the roofs, all cleaning of the walls should be deferred until after they are protected from the weather by the erection of new roofs. Plastered surfaces of ancient date are often found, and should be preserved if possible.

6. Ancient painted glass, with the original leading and iron framework, should be carefully preserved, and never allowed to be taken out of the building, save for the purpose of re-leading when absolutely necessary, and this only by competent workmen. It is not generally desirable to remove ancient stained glass, even when small fragments only remain, from the place it occupies, without first of all learning with certainty that it is not in its original position. If new stained glass be inserted in old windows, care should be taken that the glass be fitted to the old tracery, and that the latter be not replaced by new, as is too often the case. Old clear glass may, for the sake of its superiority of tint, often be re-used with advantage.

The external halves of mullions, sills, tracery, and jambs should, where practicable, have such parts as are decayed restored by dowelling new stone on to the old internal halves, which may be frequently done without taking down the uninjured part of the window.

The ancient ironwork of windows should not be taken out, even when the outer half of the stonework is removed, and it should be retained when new stained glass is put in; the glass, if needful, being designed with regard to it. So much mischief has been done by the destruction of old ironwork throughout the country that this requirement should be most rigidly enforced.

7. Any remains of churchyard walls, with their buttresses, copings, or piers, churchyard or other crosses, lichgates, external monuments, headstones, stone coffins, etc., should be preserved.

Marks of foundations, trenches, moats, etc., should be examined and noted.

8. Where it appears certain upon investigation that the earth has accumulated above the ancient level it should be removed; but even this

should not be done without professional supervision, as it is often attended with risk. Great care must be exercised, where several ancient levels exist, in determining which shall be retained, and when the floors are set on a slant, as is often the case, the original lines should, as far as possible, be carefully maintained.

9. In the restoration of stonework, no scraping or tooling of the surface of the stone should take place under any circumstances. As a general rule, no new stonework should be inserted, unless under very strong evidence that it is a renewal of the ancient design and necessary to be done. If any part of the masonry be damaged or decayed, it should not necessarily on that account be wholly rebuilt or renewed, but those parts only which are thoroughly defective should be cut out and carefully renewed with stone of similar character, and always the best of its kind.

No wholesale pulling down should be done unless unavoidable.

In many cases walls which are in themselves sound, but out of plumb, may be restored to the perpendicular without difficulty by use of screw-jacks, and without disturbance of the external face.

10. If it be found absolutely necessary to construct a new roof, owing to the existing roof being extremely decayed or modern, one of the two following courses should be adopted: either the old roof where it exists should be carefully reproduced, or the new roof should be made of the same pitch as the original roof, which may generally be discovered by the dripstone against the tower or other walls. Where the dripstones of two or three periods exist against these walls, the question of the pitch of the roof will be one of some difficulty; but as a rule it may be said that where there is a clerestory it will be well to keep to the pitch of the roof erected at the time it was built, and where there is none, then to the pitch of the earliest roof. Where lead is taken off it ought in all cases to be replaced. Flat roofs are by no means always to be condemned.

The question of the pitch of a new roof depends on so many circumstances that it must be left to the judgment of the architect, but the shape of the old roof should not be lightly altered. In some peculiar cases where there are objections to the external appearance of the flat pitch of an old roof, the flat roof may be retained internally, and the high pitch roof erected over it. Flat roofs are quite as worthy of preservation as any others.

In districts where stone slates are used for the old churches it is most desirable that they should be retained in preference to plain tiles or other covering.

Frequently the ends alone of beams and rafters are decayed through leakages of gutters. An old roof should not for this reason be discarded but new ends should be scarfed on.

11. Ancient buildings will generally be found to have been altered at various periods; when this is the case the whole of the old work should be preserved and exposed to view, so as to show the history of the fabric, with its successive alterations, as distinctly as possible. This may often be accomplished by showing all the stone and rubble work internally, and leaving it unplastered. It should, however, be understood that this is for the purpose of showing constructional features of interest, and is

not intended as a recommendation that old plaster should be stripped off, or that rough stone rubble work should be exposed to sight where originally plastered.

12. In no case should anything be done to monumental effigies, brasses, sculpture of figures and foliage, or other ornamental work, beyond carefully cleaning, or resetting them if necessary, and taking care that they shall be protected from further injury and restored, where requisite, to their original place. In all church restorations one main object should be to get rid of modern additions put up without regard to architectural propriety; but on this account the church restorer should not set up an ideal model, but regard the productions of every age with as much respect as is compatible with the restoration and use of the building. Still, if monuments deface good old work, they should be refixed in some spot where they can mutilate nothing.

Fonts, piscinæ, &c., may be carefully repaired, if necessary, to fit them for use, but all features not involved in the stability of the building should be left as far as possible untouched. Fonts, for instance, should on no account be scraped, or retooled, as has been too often the case. Features not in use, such as stoups, aumbries, &c., should be left untouched.

13. Mediæval chancel screens should on no account be moved from their old places, but be carefully restored. They seldom present any obstruction to sight or sound. Ancient seats in the body of a church should, where practicable, be retained in their old arrangement. Jacobean and later woodwork is often quite as valuable artistically, and interesting historically, as mediæval work.

14. Where curiosities, fragments of sculpture or wrought stone or woodwork, of tiles or glass too small for re-use are discovered in course of the work, it is desirable that they should all be carefully kept in some case or chest in the church, arranged and labelled with a short description of their history. This case should be under lock and key. Care should be taken that the architect's specification gives the contractor no claim upon any such things as old materials.

15. In the above suggestions it has been assumed that the promoters of the work have a proper appreciation of what is due to an ancient building, and are anxious to carry out its restoration in the most conservative manner possible; such, however, is unfortunately not always the case. The promoters of restorations, whether clergymen or laymen, are sometimes more bent upon carrying out new works than preserving old; it cannot be therefore too strongly insisted upon, that in dealing with an ancient church or other building, the object should be not simply to put it in good repair, but to preserve it as an authentic specimen of the ancient arts of our country. Every old building has historical value, and it should be remembered that this is gone when its authenticity is destroyed.

The duty, therefore, of all those having charge of ancient buildings should be not so much the renewal of what remains as its preservation; and this should embrace every portion of original work which it is in any way possible to save, for it must be remembered that new work is of

no value or interest except so far as it serves to preserve the ancient design, and that no interest will ever be attached to it unless original parts remain to attest its authenticity.

There is ample scope for original design in additions which are necessarily made to the size of old buildings, and in these it is usually best to allow the architect to be independent. His work will then have its due historical value; whereas, if he only make a very good copy of the old work to which he is adding, great confusion will be felt hereafter as to which part of the work is old and which modern.

16. A vigilant guard should be kept against the indulgence of individual fancies for or against particular features or styles; and especially against the theory sometimes held that a restored church must be purged of all features subsequent to some favourite period. All such ideal notions are in the highest degree dangerous, and have rendered many a restored church actually worthless as an historical monument.

17. In vain are all the efforts of central or diocesan architectural or archaeological bodies, with their several visits to buildings of historic interest, if those having charge of precious remains do not cordially embrace such advice as is here laid down for their conservation, embodying principles impossible to controvert, and the neglect of which has been the cause of many districts being robbed of their antiquities through rash and unskilful operations. Influential landed proprietors, the clergy, churchwardens, and others, are earnestly reminded of the responsibility which rests upon them to resist all needless destruction of ancient work, and to seek competent professional aid in cases of interference with an ancient building. Questions of considerable embarrassment constantly arise in connection with edifices of mixed dates, involving constructional and chronological difficulties, points requiring the judgment of the most experienced architect and antiquary. Moreover, the successful preservation of old work must largely depend upon the builder. Care, therefore, should be taken to select a man who will take an interest in the work, and who can be trusted to carry out faithfully the instructions of the architect. To prevent the mischief that may otherwise be done in the absence of the architect, it is always desirable, and generally essential, that there should be a resident clerk of the works, familiar with church restoration, appointed by the architect.

18. Vigilance is required to stop injuries to ancient buildings; the utmost watchfulness should be shown by those residing at or near the spot where even well-considered works are in operation, to see that they are really executed in a conservative manner. However frequently the architect may visit the works under his superintendence, he cannot at all times prevent his orders being disobeyed, and a daily and almost hourly inspection is often necessary. Intelligent interposition will always be welcome to a zealous architect, and, by gaining time, will often prevent irreparable mischief. Lovers of antiquities, ecclesiologists, and antiquaries in the locality will always do good service by carefully watching works in progress in old buildings.

19. The foregoing suggestions and remarks have been drawn up with special reference to the restoration of churches: the same spirit ought

to actuate those who have the care or ownership of ancient civil or military buildings, because from their comparative rarity they are even more valuable as historical monuments than the churches.

HINTS TO WORKMEN ENGAGED ON THE REPAIRS AND RESTORATION OF ANCIENT BUILDINGS.*

[First issued in 1865 ; revised and enlarged in 1888.]

Excavator.—In making excavations in or about an ancient building, be careful to preserve every fragment of wrought stone, tiles, or other ancient objects which you may meet with.

If you find old foundations, bases of pillars, ancient tombs, stone coffins, pavements, or other work, which appear to be in their original place, do not remove, but carefully expose them to view, in order that proper notes may be taken of them ; and that, if possible, the work may be left permanently in its place.

In making drains or excavations around old buildings, do not cut off any of the projecting footings, however rough, and be careful how you expose them, unless they are examined and underpinned by the mason. Do not permanently expose to view, or to the air, work which clearly was not intended to be so exposed. See that your drains are so managed as to draw the water *from* the foundations and not *towards* them.

Mason.—If directed to clean off whitewash, or paint, from internal or other stonework, recollect that the object of so doing is to *bring to view* the original surface, not to *destroy it*. You must, therefore, avoid the use of the *tool*, and study what is the best way of removing the whitewash without in any degree disturbing, much less removing, the ancient surface. Remember that the mode of tooling or working the ancient stone is a subject of interest and curiosity, and that the old tool-marks must therefore not be disturbed : more especially does this caution apply to early Romanesque work, where the very coarseness of the stone, and rudeness of execution, are important evidences of date. If indications of ancient colouring be found on the surface of the stone they should be carefully preserved.

The mode of removing whitewash depends much on the nature of the material. With some materials nothing is so good as the Manchester card, but in each case experiments should be tried to ascertain the best mode. *It is better to leave the whitewash wholly or partially on the stone, than to use any tool which would disturb the surface of the stone itself ;* for it is far better to have the old surface with the whitewash than not at all.

When the removal of plaster shows the marks of ancient string-courses, weatherings, windows, &c., do not conceal these again, nor yet tool them off ; indeed, as a general rule, *no tool should be used upon the surface of ancient stonework.*

In removing broken or decayed work, do not take out any but such as is so far gone as to have lost *all* its original form ; better have broken or half-decayed original work than the smartest and most perfect new work.

* To be obtained at the Office of the Institute, price Ninepence.

Especially avoid using a brush with colours to harmonise the new and old work; the old work should be left in all its characteristic tone, and no attempt should be made to harmonise the hue in tint.

Never remove or clean the old mossed surfaces.

In obtaining the true sections of mouldings, &c., for new portions, the most scrupulous accuracy is necessary, as the more delicate features are often to be traced only in a few of the more protected parts.

In taking down portions of walls, be most careful of any old mouldings, or other wrought stone, found embedded in them, and note *where* they were found, as the fragments have usually been stowed away near to their original site. If any windows or other features are found which have been before concealed, do not disturb them till seen by the architect. Encaustic tiles, or other ancient paving, should be preserved where found, when possible, and the patterns should guide the design of new paving. Ancient monumental remains are never to give way to new encaustic tile flooring, but are in every case to retain their old position.

Carver.—The same principles as are laid down for the mason apply to the carver, but in a higher degree, inasmuch as ancient *carving* is still more valuable than ancient *masonry*. When engaged on an old building, bring your own talent and fancy wholly into subjection to the work in which you are engaged, and only seek to preserve and perpetuate the ancient design. Never attempt to dress up or restore old carving.

Plasterer.—If directed generally to remove the plastering, first examine it carefully by removing the whitewash here and there, and if it be found to contain oil painting, &c., do not disturb it without calling the attention of the architect, clerk of the works, or other persons capable of judging it.

If it be absolutely necessary to take down the wall so covered with old paintings, it might be preserved in the following manner:—The backing of the wall might be carefully taken away, leaving only a thin piece behind the painting; this might then be backed up with cement and pieces of large size enclosed in wooden frames. The painting might then be removed and deposited in a museum.

As a general rule ancient plastering should not be removed, but only repaired where necessary. Let new plastering on old walls be thin, and carefully thinned off to meet the stone dressings, as in ancient work. All plasterings should be of a kind suited to receive decorative painting.

Carpenter.—Do not be too ready to condemn an ancient roof, or other piece of timber work. Remember that it has a value quite independent of the cost of renewing it. An ancient roof, carefully preserved by splicing and other means, is infinitely more valuable than a copy of the same in new timber. Very serious defects may be repaired, if you view the roof as a thing of value, and apply your mind to ascertain the best way of *securing* and *preserving* it. If you do not do this, very trifling defects may be made the excuses for destroying the finest ancient roof. Do not as a general rule *take an old roof off* to repair it, but rather repair it in its place, *bay by bay*, and only in the Spring or Summer months. By a good system of tarpaulins, or other means, keep the roof dry during the operation: exposure to wet is fatal to old timber.

Do not disturb ancient surfaces of timber, nor coat old timber with oil or varnish. Generally (as directed to the mason) remember that your great object is *preservation* rather than renewal. Preserve with the utmost care all remains of coloured decoration on old woodwork.

Joiner.—The same general rules as are laid down for the carpenter apply to the joiner.

Preserve ancient seating *in its proper place* if possible, and where practicable avoid removing it for repairs, except by special direction. Every remnant of old woodwork, of whatever description, should be carefully preserved, and, where possible, in its place; or, if it has already been removed, it should be brought back to its place if possible.

Glazier.—Be *most careful* in preserving ancient stained glass. Never remove it from the windows in which it is found (unless under special direction of the architect), but preserve it carefully *in its place*, however rough and imperfect, or however small the fragments.

Painter.—Preserve all remnants of ancient painting, but do not attempt their restoration unless under special direction.

Smith.—Preserve all remnants of metal-work in their places if possible; and never remove old saddle-bars or stanchions from windows except under direct instructions from the architect.

To Contractors and Workmen in General.—Never forget that the reparation of an ancient church, or other remnant of ancient architecture, however humble, is a work to be entered upon with totally different feelings from a new work, or from the repairs of a modern building.

The object is not simply to put the work in good repair, but to *preserve* and *perpetuate* an authentic specimen of the ancient arts of our country. Every ancient building has historical value, and though you may feel that its state of repair would at first sight suggest its renewal, or that you could execute the work better anew, never forget that all its value is gone when its authenticity is destroyed; and that your duty is not its *renewal* but its *preservation*.

Be careful, therefore, never lightly to condemn an ancient object as being too far gone to be preserved, as every such work destroyed is a national loss.

R.I.B.A. STANDARD SIZES OF BRICKS.

The accompanying diagrams illustrate standard sizes of bricks which have been agreed upon with various bodies as indicated below. No. 1 (Diagram A) was agreed upon between the Institute and the Brickmakers' Association and was drafted as follows in consultation with these bodies and with representatives of the Institution of Civil Engineers in 1904:—

1. The length of the brick should be double the width, plus the thickness of one vertical joint.

2. Brickwork should measure four courses of bricks and four joints to a foot.

Joints should be $\frac{1}{4}$ inch thick and an extra $\frac{1}{8}$ inch, making $\frac{7}{8}$ inch for the bed joints to cover irregularities in the bricks. This gives a standard length of $9\frac{1}{2}$ inches centre to centre of joints.

The bricks, laid dry, to be measured in the following manner:—

(a) Eight stretchers laid square end and splay end in contact in a straight line to measure 72 inches.

(b) Eight headers laid side to side, frog upwards, in a straight line to measure 35 inches.

(c) Eight bricks, the first brick frog downwards and then alternately frog to frog and back to back, to measure $21\frac{1}{2}$ inches.

A margin of 1 inch less will be allowed as to (a), and $\frac{1}{2}$ inch less as to (b) and (c). This is to apply to all classes of walling bricks, both machine and hand-made.

In the early part of 1919 the Institute was requested to make some variations in the standard, and after consultation with the allied societies a conference was held on 28th June, 1919, at which were present representatives of the R.I.B.A., the Institute of Clayworkers, the President of the Northern Federation of Building and Engineering Brick Trades, the Secretary of the Employers' National Council for the Clay Industries, and representatives of the South-Western District and Midland District. It was reported that the Northern Federation, which represents the six northern counties, had come to an agreement with the Government to make the standard size for bricks $2\frac{1}{4}$ inches in height. The Conference recommended that a second standard size should be added to the R.I.B.A. standard, all the dimensions to agree with the present standard except that four courses of bricks and four joints are to measure 13 inches. The maximum depth of eight bricks, laid frog to frog and back to back alternately, to measure $23\frac{1}{2}$ inches. The minimum depth of eight bricks laid similarly to measure 23 inches. This was approved by the R.I.B.A. Council on 21st July, 1919.

The bed joints with the maximum bricks would be $\frac{1}{8}$ inch, and with the minimum $\frac{1}{4}$ inch to give 13 inches to four courses of bricks and four joints. This standard will apply to the counties of Northumberland, Cumberland, Durham, Westmorland, Yorkshire and Lancashire.
